This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

# PUBLISHER'S PREFACE.

The history of the undertaking *A. L. A. Catalog* is set forth in the editorial preface which follows. The first edition was, it will be noticed, issued by the Bureau of Education, and by direct action of Congress. Since 1893, however, the Library of Congress, promoted into the position of a national library for the United States, has come to be the logical agent of the government for such an undertaking presumed to be in the interest of American libraries as a whole.

It agreed to publish and distribute this revised edition. As appears from the editor's preface, however, its cooperation has actually gone further than this: it printed also and distributed the preliminary trial lists, and it prepared the material which forms the Dictionary section of the *Catalog*. This it has also reproduced with fuller entries on cards: so that a complete card catalog of the entire 8,000 volumes may be procured from it, at nominal cost, under its system of card distribution.

It did not, however, take direct part in the selection of the books.

*Distribution.*—A single copy of the *Catalog* complete, in cloth, will be sent free of charge to every library in the United States, and to foreign libraries on the exchange list of the Library of Congress, or making specific request.

Other copies, either of the complete work or of either part, in cloth or paper, may be had by addressing *The Superintendent of Documents, Washington, D. C.*, and forwarding the price below stated (a nominal charge, to prevent waste):

| | |
|---|---|
| Complete (parts 1 and 2). | Price: Cloth 50 cents, paper 25 cents. |
| Part 1 *or* part 2 separately. | Price: Cloth 25 cents, paper 15 cents. |

It would have been difficult if not impossible to print the *Catalog* in the short time remaining for publication before the A. L. A. conference at St. Louis without the energetic efforts of the various members of the Library of Congress staff—especially, if any may be particularly mentioned—of Miss Irene Gibson, Mr. F. Neumann and Mr. W. D. Johnston, who have devoted to it much outside time; or without the prompt and efficient cooperation of the chief of the Catalog division and of his assistants, who not merely prepared but, under the direction of Miss E. A. Runner, proof read the Dictionary section. The preparation and proof-reading has involved the constant services, in addition to the supervision of the Chief, of no less than seven catalogers for the past eight months. Unofficial time has been freely given.

The remarkable speed with which the Public Printer has put the matter into type, on the press, and through the bindery, is due largely to the personal interest of the Foreman of Printing, Mr. O. J. Ricketts, and the ready response of his staff, who have applied freely the vast typographic resources at their command.

## NOTE BY THE A. L. A. PUBLISHING BOARD.

The A. L. A. publishing board commends this *Catalog* to libraries and readers with the conviction that, while it may not meet every expectation or requirement, it will be found one of the most useful bibliograpical manuals that have been issued. The editor's preface gives so complete a statement of the purposes of the work, and of the history of the undertaking, that little remains for us to add. To the determined and energetic efforts of the editor and his efficient coadjutors we owe whatever of excellence the work may possess. The delays in the publication have been in the interest of increased thoroughness and completeness of work; especially has it been possible to include many more notes than could have been furnished if the work had been hastened.

The board would like to add emphasis to the acknowledgments expressed in the editor's preface, particularly to the Library of Congress and its librarian, without whose most generous and hearty help the work could not have been published in a form and on terms so advantageous to the libraries and the people of the whole land.

To the many examples of effective cooperation which our association has furnished this may well be added as among the chief.

# EDITORIAL PREFACE

At its Boston meeting in 1879 the American library association enthusiastically adopted the proposal of the present editor to prepare and publish a list of about 5,000 of the best books with compact notes indicating scope, character and value, to be known as the *A. L. A. catalog*. It was pointed out that such a list would serve:

1 As a guide to bookbuyers whether for private or public libraries. It is not uncommon for a library to pay some single individual hundreds of dollars for making a list representing merely his individual choice of books, not only on subjects with which he is familiar, but also on the much larger number of which he knows practically nothing. A copy of this *Catalog* would be much more valuable, would be in print instead of ms, and several duplicates could be checked up at trifling cost for getting estimates or other purposes.

2 As a guide to readers in choosing what books they might best take from the library or from their own shelves.

3 As a manual to teach the younger and prompt the older librarians or booksellers in answering most wisely the constant inquiry for the best book on a given subject.

4 To take the place of the printed catalog in small public libraries. The call number of all books in the library could be written in the margin, thus showing at once that the library had the book and where it could be found, while unmarked titles would be the best list for early purchase.

5 As a most convenient catalog for private libraries, by checking in the margin all books owned.

6 As a check list of books read, personal notes being added in margins.

Liberal subscriptions were made for copies and much material was collected when work was interrupted by the editor's absorption in other duties. After various proposals for resuming work, the joint cooperation and finance committees, who had been given full power in the premises in 1884, turned the entire matter over to Melvil Dewey as editor, on condition that no financial responsibility should rest on the association. Owing to lack of means little more was done till the World's Columbian exposition gave opportunity to get out an imperfect first edition without notes. As the notes were to be the chief feature of the *A. L. A. catalog*, the 1893 book was called *Catalog of A. L. A. library*, reserving the other name for a list including the all important notes as guides to readers. By the testimony of the U. S. commissioner of education, who published several large editions, it was of even greater service than anticipated. The books were selected by a committee of leading members of the A. L. A. of which J. N. Larned was chairman, and the cataloging was done in the New York state library under Mrs S. C. Fairchild's supervision, the U. S. bureau of education paying the salaries for much of the office work, as the library was to be

its permanent property at the end of the Columbian exposition of 1893, where the A. L. A. library was exhibited and attracted great attention. The list has been used by thousands of libraries and private buyers as a guide in selection.

In 1894 a committee was appointed, with Mrs Fairchild as chairman, to prepare needed supplements. Progress was delayed by many difficulties, and just as the section on education was to go to the printer, it was proposed that instead of a supplement a new work complete in itself should be prepared as the chief A. L. A. exhibit at the St Louis exposition. This plan was adopted. The New York state library had, in 1889, authorized its director as editor of the *Catalog* to prepare and issue it as a state library publication. Though relieved of publication of the 1893 volume by the cooperation of the Bureau of education, the New York state library continued to gather lists and notes as other duties permitted and when the Bureau of education found itself unable to bring out the revised edition as hoped, the regents of the New York state library repeated their authority to prepare and issue it and secured from the legislature a special appropriation covering part of the expenses.

The American library association having placed in the hands of its publishing board its interest in the undertaking, the board welcomed the assumption by the New York state library of the editorial work, and supplemented the financial provision made by the state of New York by an appropriation of $1,200 (afterwards raised to $1,500) to meet the necessary expense. The board has exercised a general supervision over the work and has determined questions affecting its form and general character. Most important, the Library of Congress agreed to share the burden by printing and distributing it widely as one of its publications, thus giving it a much larger free circulation than would have been possible for a state publication.

**General plan.** The list includes 7,520 volumes specially adapted to small libraries and those just starting, but suitable also for any public library. Except a few of the most important foreign classics in the original, only such foreign works as are available in English translations are included. While this *Catalog*, when carefully revised, will be the best within the prescribed limits of size and purpose that the combined wisdom of our most experienced librarians and specialists can produce, no editors could hope to make a selection from the vast mass of books of all ages and tongues wholly satisfactory even to themselves.

Best as applied to this *Catalog* means relatively to the general reader. An accurate, interesting and comprehensive statement in untechnical language that is best for a general reader may be mere a b c to a specialist, while the most recent, exact and exhaustive treatise best for a specialist may be the worst for a general reader because too technical to be intelligible. Though a mediocre book has sometimes been chosen because there is nothing better meeting the conditions, it is hoped that nothing untrustworthy or ephemeral has been admitted. Out of print books are omitted unless very important and soon to be on the market again.

Titles have been condensed by omitting unessential words. American importer and price when ascertained are given rather than foreign publisher.

**Technical books.** Many of the most valuable works proposed by experts have been omitted because outside the scope of this list, which is primarily for general readers and not for professional men or special students, but it includes many tech-

nical books on industries common to most communities, e. g. engineering and engineering materials, sanitation, building, etc.

**Adaptation to very small libraries.** To make the *Catalog* as helpful as possible to the smallest libraries that can start with only 1,000, 2,000 or 5,000 volumes, in the next edition the 1,000 best to buy first will be marked 1, the 1,000 that added to 1 will make the most useful 2,000 will be marked 2, and those that added to 1 and 2 will make the most useful 5,000 will be marked 5. This does not mean that books marked 1 are better than the others, but merely that they are considered the most useful combination for a library limited to 1,000, and so likewise of 2 and 5.

**Classification.** The definite purpose of this book is to guide in selecting books, either to read or buy; its form is chosen solely for this use regardless of what may be best for libraries in their own catalogs. For its peculiar use it must be classed by subjects for convenience of both reader and buyer. It was also desirable to allow the printing in separate pamphlets of any classes for which there should be special demand. The *Decimal classification* was chosen because its use was much more general than any other and its adoption would convenience the largest number; because all material for this *Catalog* for 27 years has been kept in this order; and because the New York state library, where the editorial work was done, could not use any other method without much confusion and extra labor.

In cases where several different numbers would be equally correct, that one has been chosen which seemed practically best for public libraries: e. g. Plato and Aristotle are classed in literature rather than in philosophy or political science, where they would go if classed strictly by content instead of in view of their larger use as classical literature; Burton's *Anatomy of melancholy* is put in English miscellany instead of under its specific subject; children's primers and readers are classed in literature instead of in education, as they are chosen for their storybook value and not for their bearing on education. Under some heads a comparatively unimportant book appears because its author's works as a whole are included: e. g. under 701 Schiller's *Essays* æsthetical; under 610 Holmes' *Medical essays* now nearly 40 years out of date.

**Proportion by subject.** The number of volumes in each main subject is given for the *Catalog* of 1893 followed by like numbers for this book. Numbers in each class cover also a selection of juveniles made by special students of children's reading.

**A. L. A. library.** The United States bureau of education has the complete collection included in the 1893 catalog as exhibited at the Chicago exposition. Frederick M. Crunden, librarian of St Louis public library, vice chairman of the committee on library exhibit at the Louisiana Purchase exposition, has collected this library of 1904 as an exhibit of a model town library in the Missouri state building. This will probably be retained by the St Louis public library after the exposition closes. The Library of Congress has also bought every book in the list not already in its collection, and the New York state library always buys any books it may lack to make its *A. L. A. catalog* complete. These libraries can be kept up to date by adding or withdrawing books as fast as changes are made. It is expected that many public libraries will start by buying the entire list.

**Selection.** The following circulars sent by the editor to critics will show the exact plan on which the work was done and make clear what the collaborators aimed to do.

### SUGGESTIONS FOR MARKING LISTS

15 November 1902

**Tentative lists.** The basis for selection in each subject will be the *A. L. A. catalog* of 1893 supplemented by lists of later publications. As presumption will be in favor of books already in the *Catalog*, the main task of selection will lie in the supplementary lists, which are intended to contain all books since 1893 with any claim to consideration. Please feel, however, as much freedom in adding as in striking out titles; for in spite of the care taken in making up the lists, some appropriate works may have been overlooked.

**Marking scheme.** If critics will use the following scheme in marking lists, it will secure uniformity that will greatly lighten the labor of combining returns for the revised list on which a second criticism will be asked before publication.

PLEASE PUT SYMBOL IN LEFT MARGIN BEFORE TITLE

| Symbol | Meaning | Symbol | Meaning |
|---|---|---|---|
| + | Keep | ? | Uncertain |
| ++ | Keep without fail | +? | Inclined to keep |
| − | Reject | −? | Inclined to reject |
| = | Reject without fail | o. p. | Out of print |
| o | No opinion | | |

Please note at least briefly the reason for which you reject or incline to reject a book; e. g. out of date (o d), too technical (tt), inaccurate (i), too little demand (d), vicious (v) The abbreviations given in ( ) may be used instead of writing words in full.

**Rejection.** From the lists are to be discarded:

1 Books out of print, unless still readily obtainable and not replaced by something better, e. g. there is nothing to take the place of the U. S. report of 1876 on public libraries, and it is easily gotten of secondhand dealers;

2 Books superseded by others giving newer information or theories, e. g. those on countries where conditions have changed like the West Indies or Philippines, or on rapidly growing sciences and industries like chemistry and electricity;

3 Editions superseded by those distinctly better for public libraries, but specify preferred edition;

4 Books that for other reasons you believe can be more advantageously replaced by others, noting in each case why you discard;

5 Books that you think have no claim to a place in so limited a list of this character.

**Notes.** Either formulated notes, rough notes or comments as a basis for notes, original or quoted, whether giving your own estimate or facts useful to a reader trying to choose between different books,

are specially requested, as they will be the most helpful feature of the *Catalog*. As many titles will be annotated as practicable in the short time available for this edition and the annotation completed in a later edition. References to good notes already in print, with criticism of either matter or manner, would be much appreciated.

Among important items for notes are point of view; trustworthiness; scope; characteristics of style (didactic, colloquial, interesting, witty, dry, involved or difficult to follow, etc.); scene; period; class of readers to which adapted.

**Edition.** If you would retain a book but substitute a different edition, cancel description of edition given and specify preferred edition.

**Suggested method.** Labor on the lists will probably be minimized by marking first the + + and =; i. e. the two extremes of books positively rejected or included. A rough count of those included then quickly shows whether they must be weeded out to come within the allowance to that subject for 8,000 volumes or whether more may be added.

The labor asked of those who kindly assist in this work will be made as light as possible by furnishing lists ready for quick checking with the symbols above, which with a minimum of work will indicate the critics' judgment and preference.

## FINAL REVISION OF LISTS

15 January 1904

The lists submitted for final expression of opinion are made up by the associate editor for selection, Mrs H. L. Elmendorf, special bibliographer of the Buffalo public library, after comparison of votes of specialists and advisory board, often supplemented by reference to reviews or examination of the books themselves.

The estimated quota, or proportion, for each class has been filled in the printed galleys. If you wish to add books, either from the typewritten lists or as new suggestions, please indicate, if possible, what books you would take out in return for those that you would put in.

As this *Catalog* is not a bibliography of the best books from a scholar's point of view, but a list of books most practically useful to a small public library, those out of print are omitted unless still readily obtainable.

**Classification.** Please do not discard a book suitable for this *Catalog* merely because found under a head where it does not belong, but say why it should be classed elsewhere. Classification of all books retained will be carefully revised.

**Notes.** Comments of two distinct kinds are asked: those helpful to editors in finally deciding what books to include; those helpful to readers in choosing what books to read. Please add information that you consider important, specially on the following points: preferred editions, with characteristics of more expensive or cheaper editions that should be mentioned in notes; details of type or printing making a book unusually agreeable or tiresome to the eyes; whether reprint from periodicals; index, whether good, bad, or lacking; point of view—whig; socialist, catholic, etc.; scope and purpose; its rank in literature of the subject; marked characteristics of style; scene; period; class of readers to which adapted.

As the time is very short for the work still to be done, please return your criticisms by earliest possible mail. We greatly wish your final opinion, but can not delay work for belated returns.

**Notes for future editions.** Immediately on publication revision will begin for the next edition, specially in adding desirable notes. An extra copy for marking by the system adopted will be sent to anyone willing to give the editors the benefit of his criticisms. All suggestions made will be so arranged as to insure consideration when the next edition is printed. No one can do a greater service to this *Catalog* than those who point out its faults, except those who show definitely how to improve it. No one can be more keenly alive to its imperfections than those who know it best, its makers.

**Acknowledgments.** For 26 years the present editor has persisted in his faith that this *Catalog* would some time appear because it was the most important and valuable single book that could be made to aid in the great public library movement. It is fitting to record here acknowledgments to those who have made it possible.

1 To the New York state library, which for 15 years has kept this *Catalog* steadily in view, has borne the heaviest burdens of preparation, and proposes with such cooperation as it can get to continue the work and make each succeeding edition better. This library selected the original lists, digested all returns, wrote all circulars and conducted all correspondence, classed the books by the *Decimal classification*, furnished the majority of the notes and edited all of them, made the index and edited copy for the class list.

Special acknowledgment is due to Walter Stanley Biscoe and Miss Martha T. Wheeler, whose practical experience in book selection and annotation and bibliographic knowledge have made their unflagging cooperation invaluable; and to Miss Elva L. Bascom, who took immediate charge of routine and clerical detail, condensed hundreds of notes from reviews (many of them among the best in the *Catalog*), edited much of the copy, and gave practical advice in formulating plans. That there are not more errors is largely due to her unceasing vigilance.

2 To the Library of Congress for generous cooperation far beyond its original promises. Besides bearing the whole cost of printing and distributing this volume, it printed and mailed preliminary and revised lists, and has made and published card and dictionary catalogs of the whole collection.

The Library of Congress staff throughout the work has cooperated most warmly to secure improvements both in substance and form, and to correct mistakes both in and out of their definite province. The editors and public are under deep obligation for the generous cooperation and warm personal interest constantly shown in this work by the Librarian of Congress and his staff.

3 To Mr W. P. Cutter, librarian, Forbes library, Northampton, Mass., for furnishing expansive classification numbers for the entire collection and for the synopsis of the Expansive Classification which precedes the dictionary catalog. These numbers appear both in the dictionary catalog and on the printed cards of the Library of Congress.

4 To the A. L. A. publishing board for its appropriation of $1,500 towards expenses, for its warm interest in the work, and for authorizing the issue under its auspices, thus recognizing more fully in fact that it represents the cooperation of nearly 300 librarians and specialists, and so is not alone from the New York state library and Library of Congress, but, as its original name suggests, represents the A. L. A.

5 To the 250 collaborators and critics carefully selected from the entire country as best able to advise in their respective fields, who have given without compensation more thought and labor and have contributed more suggestions and notes than could be reasonably expected from men whose days are crowded with important duties.

The makers of the *Catalog* are under greatest obligation to Prof. James Hardy Ropes, of Harvard, whose generous offer to substitute a carefully balanced list on religion for the rough original list was cordially accepted. His list was made the working basis for further criticism, though the resulting list, as was inevitable, varies greatly from his selection.

6 To Mrs H. L. Elmendorf, to whose rare qualifications for this work much of its merit is due. As librarian of the Milwaukee public library and later as special bibliographer of the Buffalo public library she has given so much attention to the needs of the average public library that she seemed best qualified for this important position, which she has so acceptably filled. Her choice of the 7,520 volumes was made from a list of three times that number containing much conflicting opinion. Besides deciding on the books to be included she also gave most valuable aid in furnishing notes and in choosing and revising others from the vast mass of those under consideration.

No man or committee could possibly make such a selection without leaving grounds for criticism from various points of view. In many cases several recognized authorities insisted that a certain book should be added or omitted, while others equally good insisted on just the reverse. The selection editor had all the reasons from both sides before her, in addition to a lifelong and intimate knowledge of public library needs far beyond most of the critics. With rare skill, industry and patience she has made the list after full consideration of pros and cons. In the judgment of those who know most about this catalog and the people for whom it is intended, no one else would have done this work better.

7 To Miss May Seymour, associate editor, to whom the entire executive work was committed. In both 1903 and 1904 she has given not only every working hour that could be taken from other duties but has added evenings, holidays and vacations. After plans were completed the editor left their execution to her, and in 30 years' experience he has never been better satisfied with the performance of delegated duties. Besides her executive duties, she has been constantly and most efficiently active in every department, and her rare skill and devotion to this work have added much to its practical value. To no other person are so great acknowledgments due.

# THE DECIMAL CLASSIFICATION

## EXPLANATION

The arrangement chosen for the class list of this catalog, as meeting the convenience of the largest number of users, is the *Decimal classification.* By this system the field of knowledge is divided into 9 main classes and these are numbered by the digits, 1 to 9. Cyclopedias, periodicals, etc. so general in character as to belong to *no* one of these classes are marked nought, and form a tenth class. Each class is similarly separated into 9 divisions, general works belonging to *no* division having nought in place of the division number. Divisions are similarly divided into 9 sections and the process is repeated as often as necessary. Thus 512 means Class 5 (Natural Science), Division 1 (Mathematics), section 2 (Algebra), and every Algebra is numbered 512.

Subjects are arranged in simple numeric order, all class numbers being decimals. Thus 512 Algebra precedes 513 Geometry and follows 511 Arithmetic.

**Summaries.** The first summary shows the 10 Classes into which all topics are divided. The second summary shows the 9 Divisions of each of the 10 Classes, and is useful as a birdseye view of the whole scheme on a single page. Then follow 10 pages, one for each class, showing the 9 Sections into which each of the 9 divisions of each class is divided.

**Index.** In the index, subjects are arranged in one simple alphabet, with the class number of each referring to its exact place in the preceding class list. This index includes also synonyms or alternative names for topics and other entries likely to help a reader find readily the subject sought.

# 200 RELIGION

The aim has been to make such a selection of religious books as will, for the most part, be eagerly used by almost any American community; but not to make even a small representative theological library. It will not satisfy any specialist. It will not satisfy any institution or community having a dominant religious bent. Local conditions should, probably, under such circumstances modify the selection. Avowedly controversial books are intentionally omitted.

## 620 Engineering

**Burr, W: H.** Ancient and modern engineering and the Isthmian canal. 1902. 23½cm
Wiley $3.50 n
Expansion of 6 Cooper union lectures. Concise, accurate accounts of Nicaragua and Panama canals. Written with good judgment and full knowledge of latest thought and research. *Engin. n.* v. 49, Jan. 15, sup. p. 8.

**Carpenter, R. C.** Experimental engineering and manual for testing. 5th ed. 1903. 23½cm
Wiley $6
S Standard methods for testing materials, engines and machinery. Aim not to teach how to generalize safely from experiments, but rather how to make the experiments themselves. Much of the information is found elsewhere only in scattered papers and articles. *Engin. n.* 28: 202.

**Cochrane, C: H:** Wonders of modern mechanism. 3d ed. 1900. 20cm Lippincott $1.50 n
P The trolley, electric light, 30-story building, horseless carriage, kinetoscope, and other marvels. Clear, forcible English. Providence.

**Haswell, C: H.** Mechanics' and engineers' pocket-book of tables, rules and formulas pertaining to mechanics, mathematics and physics. 69th ed. 1903. 16½cm Harper $4
Ef Including areas, squares, cubes, roots, logarithms, hydraulics, hydrodynamics, steam and steam engine, naval architecture, masonry, steam vessels, mills, limes, mortars, cements, etc. Full index. N. Y.

**Johnson, J: B.** Engineering contracts and specifications. 3d ed. 1902. 23cm Engin. n. $3
S Contains synopsis of law of contracts and complete list of descriptive and technical clauses of various kinds

of engineering specifications, for students, engineers and contractors; specifications complete and carefully worded. *Elec. world*, 32: 634.

**Johnson, J: B.** Materials of construction. 2d ed. 1898. 23½cm Wiley $6

**Patton, W: M.** Treatise on civil engineering. 2d ed. 1903. 24cm Wiley $7.50

S Bibliography, pref. p. 18.
Aims to present essential and fundamental principles and a selection of practice without attempting exhaustive treatment. *Engin. n.* 34: 79.

**Thurston, R. H:** Materials of engineering. 3 v. 1899–1903. 23½cm Wiley $8

Contents: pt. 1, Non-metallic materials of engineering: stone, timber, fuel, lubricants, etc. 5th ed. rev. 1899. pt. 2, Iron and steel. 9th ed. rev. 1903. pt. 3, Brasses, bronzes, and other alloys, and their constituent metals. 4th ed. rev. 1900.

**Trautwine, J: C.** Civil engineer's pocket-book; rev. by J: C. Trautwine jr. and J: C. Trautwine 3d. 18th ed. 1902. 17½cm Wiley $5

Bf Bibliography, p. 1008–23.
Perhaps the most consulted reference work for civil and mechanical engineer. Tables trustworthy and of great intrinsic value. *Sci. Amer.* 88: 165.

**Unwin, W: C.** The testing of materials of construction; a text-book for the engineering laboratory and a collection of the results of experiment. 2d ed. 1899. 22½cm Longmans $6 n

### 621 Mechanical engineering

**Archbutt, Leonard, & Deeley, R. M.** Lubrication and lubricants; a treatise on the theory and practice of lubrication, and on the nature, properties and testing of lubricants. 1900. 22½cm Lippincott $5.50 n

**Barber, T: W.** Engineer's sketch-book of mechanical movements, devices, appliances, contrivances and details employed in the design and construction of machinery. 4th ed. 1902. 22cm Spon $4

Text consists of diagrams, with descriptive notes on opposite pages.

——— Repair and maintenance of machinery; a handbook of practical notes and memoranda. 1895. 22½cm Spon $3.50

**Barr, J: H:** Kinematics of machinery; treatise on constrained motions of mac ments. 1899. 23½cm Wile

Elucidates and supplements Unwin's *Machi* Craver.

**Barr, W: M.** Pumping machinery; a hand-book relating to the construct management of steam and power pum chines. 1893. 24cm Lippi

Details plainly described and well illustr caution and advice evidently derived from knowledge. *Engin. n.* 29: 326.

**Blaine, R. G.** Hydraulic machinery, introd. to hydraulics. 1897. 22cm ( tech. man.)

Theoretic and practical data under each hea illustrations of late applications. *Engin. n.* 38:

**Bodmer, G. R.** Hydraulic motors and 3d ed. 1902. 19½cm (Specialists' ser. Van Nost

Authoritative and cyclopedic; subject red simplest and most exact terms. R. H. Thurs *ence.*

**Frizell, J. P.** Water power; an outli development and application of the flowing water. 3d ed. 1903. 23½cm W

Comprehensive and up-to-date; in no sense e New practice plainly set forth and illustrated ples from existing power plants. *Engin. n.* 45

**Goodman, John.** Mechanics applied neering. 1899. 19cm Longm

Much condensed, but clear and logical. 42: 312.

**Hiscox, G. D.** Compressed air; its pr uses and applications. 1901. 25cm H

Compilation of all sorts of information f papers and trade catalogs presented in a se semi-technical manner. *Engin. n.* 48: 30.

**Horner, J. G.** Principles of fitting; by a foreman pattern maker. 1893. 18cm
Macmillan $1.50

Directs attention to cardinal matters at basis of the trade. Pref.

**Hutton, F: R.** Gas-engine; a treatise on the internal-combustion engine using gas, gasoline, kerosene or other hydrocarbon as source of energy. 1903. 23½cm Wiley $5

Bibliography, p. 467-69.
Describes American types. Craver.

**Kent, William.** Mechanical engineer's pocket-book; a reference-book of rules, tables, data and formulæ. 6th ed. 1903. 17½cm
Wiley $5

Aims to cover mechanical engineering as thoroughly as Trautwine covers civil engineering. Notable feature is quotation of authority on which rules, tables, formulas, etc. are based. *Engin. n.* 33: 328.

**Lineham, W. J.** Text-book of mechanical engineering. 5th ed. 1902. 21cm
Lippincott $4.50 n

Pt. 1, Workshop practice, contains general operations: pattern making, molding, forging, machine tools, fitting and erecting, etc. pt. 2, Theory and examples: strength of materials and structures, energy and transmission of power, heat and heat engines, hydraulics and hydraulic machines. 732 drawings in text, 18 folding plates. Good index. *Ath.* '95, 2: 495.

**Low, D: A., & Bevis, A. W:** Manual of machine drawing and design. Rev. ed. 1902. 22cm Longmans 75c n

Text concise and plain, illustrated by dimensioned shop drawings. Adapted for students but also full of practical workshop hints and suggestions. *Engin. n.* 29: 463 (B)

**Roberts, E. W.** Gas-engine handbook. 4th ed. 1903. 13½cm Gas engine $1.50

Details of principle of internal combustion engines, various types, fuels and heating values, operations and care of gas and gasolene engines, internal combustion engines, building and designing of gas engine. Requires knowledge of simple equations in algebra. *Elec. world*, 35: 799.

—— On marine motors and motor launches. 1901. 16cm (Rudder on ser.) Rudder $1

Devoted exclusively to gasolene motor. Pittsburg.

**Robinson, S. W.** Principles of mechanism. 1903. 23½cm Wiley $3

Aims to treat whole subject of mechanism so systematically and comprehensively that by its aid any machine may be analyzed into its elementary combinations, and the character of their motions determined. Pref.

**Robinson, William.** Gas and petroleum engines. 2d ed. 2 v. 1902. 22½cm (Finsbury tech. man.) Spon $8.50

Aims to aid students and engineers in studying engines and principles that underlie and control their action. Traces evolution of internal combustion engine. Chief types of motors shown by many illustrations. Pref.

**Rose, Joshua.** Complete practical machinist. 19th ed. 1903. 20½cm Baird $2.50

Lathe work, vise work, drills and drilling, taps and dies, hardening and tempering, the making and use of tools, tool grinding, marking out work, machine tools, etc. Title.

**Smith, A. W:** Materials of machines. 1902. 19cm Wiley $1

Short discussion with particular attention to physical and mechanical properties of iron and copper and their alloys. Intended to aid in selecting materials for various parts of machines. Pittsburg.

**Tayler, A. J. Wallis-** Refrigeration, cold storage and ice-making. 1902. 23cm
Van Nostrand $4.50 n

Elaboration of *Refrigerating and ice-making machinery.* Appendix: Useful tables and memoranda; Bibliography of refrigeration.

Traces mechanical development of different refrigerating processes and describes machinery and appliances employed in modern and improved practice. Copiously illustrated. *Engin. n.* v. 48, 18 Dec. lit. sup. p. 4.

**Unwin, W: C.** Elements of machine design. Rev. ed. 2 v. 1901. 18cm (Text-bks. of sci.)
Longmans v. 1, $2.25; v. 2, $2

Admirable and unique. Fairly complete account of methods of proportioning parts of machinery, specially of steam engine. *Science*, 16: 10 (B)

**Usher, J: T.** Modern machinist. 5th ed. 1904. 20cm Henley $2.50

Compendium of shop methods, showing a variety of special tools and appliances. Ed. sel.

**Van Dervoort, W: H.** Modern machine shop tools, their construction, operation and manipulation, including both hand and machine tools. 1903. 24cm Henley $4

Describes minutely and illustrates 673 tools and methods. N. Y.

**Wilson, H. S.** Practical tool-maker and designer: a treatise upon the designing of tools and fixtures for machine tools and metal working machinery. 1898. 23½cm Baird $2.50

**Wood, De Volson.** Turbines, theoretical and practical. 2d ed. 1896. 24cm
Wiley $2.50

Seeks to simplify solution of turbine problems by deducing from wheels of commercial proportions certain numeric results. *Engin. n.* 33: 232.

### 621.1 Steam engineering

**Forney, M. N.** Catechism of the locomotive. 2d ed. 1890. 21½cm
Van Nostrand $3.50

Based on Georg Kosak's *Katechismus der locomotive.*

Clear, simple description of construction and working of the locomotive engine. On many railroads the standard for examination of firemen for promotion. *Van Nostrand*, 19: 25.

**Kent, William.** Steam-boiler economy. 1901. 23½cm Wiley $4

Eminently practical and useful. *Sci. Amer.* 85: 44 (B)

**Neilson, R. M.** Steam turbine. 2d ed. 1903. 23½cm Longmans $3.60

Includes short history of development, sketches theory and describes in detail the De Laval, Ra'eau and Parsons types. Chapter on propulsion of ships by turbines. Pittsburg.

**Peabody, C. H., & Miller, E: F.** Steam-boilers. 1897. 24cm Wiley $4

S Authors professors in Mass. institute of technology. Illustrations excellent. *Engin. n.* 37: 272.

**Reagan, H. C.** Locomotives: simple, compound, and electric. 4th ed. 1902. 19cm Wiley $2.50

Ed. 1-3 issued under title *Locomotive mechanism and engineering.*

Deals largely with handling and emergency repairing. *Engin. n.* 36: 304 (B)

**Reeve, S. A.** Thermodynamics of heat-engines. 1903. 19½cm Macmillan $2.60 n

Contents: Theory: Application of theory to practice.

Appended: The steam-table, comp. from various sources by S. A. Reeve, 1903, 42 p. of tables, 35c n.

**Ripper, William.** Steam-engine theory and practice; with 438 illustrations. 1899. 22½cm Longmans $2.50

Sequel to author's elementary book *Steam.* Pref.

Most useful portions to American engineers are those which give the applications of thermodynamic analysis to actual engine conditions. *Amer. mach.* 23: 97 (B)

**Spangler, H: W.** *& others.* Elements of steam engineering. 1903. 23½cm Wiley $3

Intended to bring before beginner examples of various forms of apparatus used in modern steam power plants, to explain simply and briefly construction, use and reasons for using these various parts or machines, and to give him a working vocabulary. Pref.

**Thurston, R. H:** History of the growth of the steam-engine. 4th ed. 1897. 19½cm (Internat. sci. ser.) Appleton $2.50

——— Manual of steam-boilers. 7th ed. 1901. 23½cm Wiley $5

S Exhibits fully progress of boiler in construction and adaptability for various purposes. Chapter on operation and care of boilers clear, concise and worthy of close attention. *Van Nostrand,* 16: 35.

——— Manual of the steam engine. 5th ed. 2 v. 1900–02. 23½cm Wiley pt. 1, $6; pt. 2, $7.50

Contents: Structure and theory; Design, construction and operation.

For educated, practical engineers and advanced technical students. Combines long established thermodynamic theory of the heat engine with wastes in practical use, or losses of heat and energy, and thus establishes complete theory of the machine, its operation and efficiency. *Engin. n.* 26: 212.

**621.3 Electric engineering**

**Atkinson, A. A.** Electrical and magne culations. 2d ed. 1903. 19cm Van Nostrand

Covers the definite theory of electricity and m and enforces each phase with admirably clear a tical computation. Numerous problems illustra fully worked out; judiciously selected problems tion. Exhaustive index. *Elec. world* 40: 142.

**Bell, Louis.** Electric power transmissi ed. 1901. 24cm McGr

R Aims to set forth as simply as possible pre tice. For business man rather than student; t eminently practical. *Engin. n.* 37: 192.

Value appreciably increased by addition of sh ter on recent achievements in high-voltage tran *Engin. n.* 43: 63.

Story of two lovers separated by Fate. Baker.

——— Smoke; tr. by Constance Garnett. 1901. 17½cm Macmillan $1.25

Vivacious picture of social life among Russians living at Baden, full of satire, and animus against the Slavophil party. On the passionate intrigue of a young man and a married woman in love with each other Turgenev concentrates his most refined art. Baker.

——— A sportsman's sketches; tr. by Constance Garnett. 2 v. 1895. 18cm Macmillan $2.50

Contents: v. 1, Hor and Kalinitch; Yermolaï and the miller's wife; Raspberry Spring; The district doctor; My neighbour Radilov; The peasant proprietor Ovsyanikov; Lgov; Byezhin prairie; Kassyan of Fair Springs; The agent; The counting-house; Biryuk; Two country gentlemen; Lebedyan. v. 2, Tatyana Borissovna and her nephew; Death; The singers; Piotr Petrovitch Karataev; The tryst; The hamlet of the Shtchigri district; Tchertop-Hanov and Nedopyuskin; The end of Tchertop-Hanov; A living relic; The rattling of wheels; Epilogue: The forest and the steppe.

Stories and studies of Russian life and character, strung on the thread of a wanderer's adventures. They portray the serf and serfdom; bringing out touchingly the simple loyalty, affection and immeasurable endurance of the Russian poor. Many descriptive passages of scenery of central Russia. Baker.

**Turgenev, I. S.** Virgin soil; tr. by Constance Garnett. 2 v. 1896. 18cm Macmillan $2.50

Like *Smoke*, written in exile, a reply to Dostoyevski's *Les Possédés*, which was itself called out by the nihilist doctrines incorporated in *Fathers and children.* Both Turgenev and Dostoyevski deal with the same theme, the subterranean world of political agitation and conspiracy which was threatening the peace of Russia. Embittered by feeling and deeply pessimistic. The conspirators are invested with generous qualities, while the official classes are painted in dark colors. Baker.

**Polish fiction**

**Sienkiewicz, Henryk.** The deluge: an historical novel of Poland, Sweden, and Russia; tr. by Jeremiah Curtin. (Popular ed.) 2 v. 1898. 20cm Little $3

Sequel to *The deluge.*

——— "Quo vadis:" a narrative of the time of Nero; tr. by Jeremiah Curtin. (Popular ed.) 1897. 19cm Little $1.50

Largely inspired by neo-Christianism. Broad picture of Roman life in all its light and shade, splendors and horrors, bringing into salient contrast the licentiousness of paganism and the spiritual beauty of Christianity. Scenes of court life and of Christian worship, the burning of Rome, and the massacres in the amphitheater, are woven into a rapid narrative. Baker.

——— With fire and sword: an historical novel of Poland and Russia; tr. by Jeremiah Curtin. (Popular ed.) 1898. 20cm Little $1.50

Sequels, *The deluge* and *Pan Michael.*

Together contain the romance of the history of Poland 1647–1751. The impression left by this work is that of a succession of scenes of battle, carnage, devastation, lust and fiery heroism. But there are quieter scenes of village life, the domestic life of the gentry, etc. Baker.

## 912 Maps. Atlases

The question of atlases is a difficult one for all libraries. German and English maps are more scholarly and more beautiful than American, but for American use an American atlas is necessary.

Rand, McNally & Co.'s new *Imperial atlas of the world,* $2.50, is good. Ed. sel.

Cram's standard American railway system atlas of the world. 1904. 47x37½cm Cram $12.50

Rf Showing all the railway systems in colors; accompanied by a complete and simple index of the United States. Title.

**Rf** Covers biography, geography, history, literature and mythology as well as archeology. The authoritative classical dictionary in English is Smith's *Dictionary of Greek and Roman antiquities*, 3d ed. 1890, 2 v. (Little $14 n) It does not, however, cover biography and mythology or geography, as separate works are devoted to these subjects. Cornish's *Concise dictionary of Greek and Roman antiquities* (Holt $4) Rich's *Dictionary of Roman and Greek antiquities* (Longman's $2.50) and Seyffert's *Dictionary of classical antiquities* (Macmillan $2.25 n) are all scholarly and inexpensive and any one of them sufficient, possibly, for many libraries.

**Mahaffy, J: P.** Greek life and thought, from the age of Alexander to the Roman conquest. 1887. 19cm Macmillan $3.50

Sequel to *Social life in Greece from Homer to Menander.*

**Schuchhardt, Carl.** Schliemann's excavations; an archæological and historical study; tr. by Eugénie Sellers; with apx on the recent discoveries at Hissarlik by Dr Schliemann and Dr Dörpfeld, and introd. by Walter Leaf. 1891. 23½cm Macmillan $4

Compact and intelligible account of Dr Schliemann's excavations at the supposed site of Troy, at Tiryns and at Mycenae, as well as at some less important sites. Not Dr Schliemann's theories alone, but matured opinions of many scholars are utilized. St. & K.

If there is special interest in archeology, the library may well buy the 3 works by Dr Schliemann (*Ilios*, Harper $7.50; *Mycenae*, Scribner $7.50; *Troja*, Harper $5) which have been omitted because of their expense and because of little probable use. Ed. sel.

**Smith,** *Sir* **William,** *ed.* Dictionary of Greek and Roman geography. 2 v. 1878. 24½cm

# A. L. A. CATALOG

8,000 VOLUMES FOR A POPULAR LIBRARY, WITH NOTES

1904

## Part 2: Dictionary Catalog

With synopsis of Expansive Classification

Washington
Government Printing Office
October, 1904

# EXPLANATORY NOTE

*A. L. A. catalog*, part 2 (dictionary plan), has been compiled in two forms:

1 On cards including full entries under authors, subjects, titles and other added headings.

2 In the present form with abbreviated titles to serve: (*a*) as an author and title index to the class list (pt. 1); (*b*) as an aid to smaller libraries about to compile a dictionary catalog while using the A. L. A. collection as a basis.

**Rules.** In the compilation, the A. L. A. rules—Advance edition, 1902, has been followed in *author and title entries.* For *subject entries* the A. L. A. list of subject headings with occasional modifications borrowed from the dictionary catalog of the Library of Congress has formed the chief guide.

**References.** An attempt has been made to supply cross references correlating allied subjects. Uncertainty in regard to the final selection of titles has prevented a thorough coordination of the latter as well as of many of the subject entries. Omission of some references as well as the inclusion of others which should have been omitted is accounted for mainly by the fact that final decisions in regard to the omission or insertion of certain titles were received after the greater part of the Catalog had been printed. In the brief time remaining it was not possible to carry out all the modifications of subjects and references required by such changes. All *see also* references from subjects under which no titles are found to related subjects are omitted from the book catalog. They are, however, supplied in the card catalog. A full set of the reference cards will probably be printed to accompany the dictionary catalog in card form.

**Title entries.** Title entries have been made for all books in fiction and drama, and for others whenever the title was one likely to be remembered; also occasionally to supplement subject entries.

**Analyticals.** Many analyticals and added entries which are indicated on the cards and therefore to be found in the corresponding card catalog were omitted for want of time and lack of space.

**Subdivision of subjects.** Under names of important countries, as well as under subjects, subdivisions have been introduced to an extent which may seem unnecessary in a catalog of 6,000 titles. It was, however, considered advisable to retain them as a guide to libraries in their further development of a catalog of this collection.

**Class numbers.** The numbers of the decimal and expansive classifications follow at the end of each title.

**Series entries.** Series entries have been supplied in all cases, but owing insertions or withdrawals of titles at the last moment, omissions or other discrepanc may occasionally be noted.

**Prices.** Prices of books are given under main entries. Variations betw parts 1 and 2 in citing the price of a given book may occur. In that case the pr given in the class list represents the latest information procurable.

**Type.** Different classes of entries are distinguished as follows:

(*a*) Main entries: author's name or first word of title in black face.

(*b*) Subject headings: in Roman small capitals.

(*c*) Title references, series titles, etc.: in Roman lower case.

(*d*) Titles and other explanatory words or phrases used in headings, sub visions of subjects, also the words "see" and "see also" in references, etc.: in itali

**Orders for printed cards.** A consecutive number to be used in orderi printed catalog cards from the Library of Congress is placed after the price in ea main entry. Following the consecutive number, but separated from it by a slanti line, is placed another number, which indicates the number of copies of the ca required for the main entry and all the additional entries suggested on the corr sponding L. C. card. Printed cards can therefore be ordered by sending to t Library of Congress a list of the consecutive numbers corresponding to the titl for which cards are desired.

Further particulars in regard to ordering cards for books listed in this catal can be obtained on application to the Library of Congress, "card section."

# THE EXPANSIVE CLASSIFICATION

## EXPLANATION

The original feature of the notation is the use of LETTERS to mark NON-LOCAL SUBJECTS and *figures* from 11 to 99) to mark *places*. This makes it possible to express the local relations of a subject in a perfectly unmistakable way, the letters never being used to signify countries and these figures never being used for any other subjects but countries. Thus 45 is England wherever it occurs; e. g. F being history and G geography, F45 is the history of England, G45 the geography of England. This local notation can be used, not merely with the main classes, but in every subdivision, no matter how minute, which is worth dividing by countries. Whenever one wishes to separate what relates to England from other works on any subject one has only to add the two figures 45. Whenever one sees 45 in the class mark of a book one knows that the book so marked treats its subject with special reference to England. This "local list" by the figures gives marks to the 8 most important countries. The addition of a third and sometimes a fourth figure gives marks for all the independent countries in the world. Parts of and places in countries are arranged alphabetically under each, and are marked either by the usual Cutter order-table, which has initial letters followed by figures, or by a special Cutter order-table composed of figures alone.

The first part of the classification, as published, contains the first six classifications and a combined index to them all. The seventh, the fullest classification, will have ten sections. Seven of them (Philosophy, Religion, Historical sciences, Social sciences, Medicine, Language and Literature, Recreative and Fine arts) are published, each with its own index. When these and the other Generalia (Natural sciences and Industrial arts) are printed, with their indexes, a full index to the whole will be made.

The classification of the books in this catalog has been done by Alida M. Stephens and Albert R. Nichols, under the direction of W. P. Cutter.
